Neebo Virtual Analytics Hub

Benefits

Rapid Answers to New Questions

Deliver same day answers to new questions posed by management.

Detailed Actionable Results

Create wider, deeper results to deliver detailed answers management desires.

Increased Use of Analytics Assets

Share and reuse assets to deliver greater ROI from the analytics teams.

Trusted Results thru Collaboration

Created more trusted assets and results through AI and collaboration.

Neebo's collaboration and AI-driven features are a game-changer that brings my team together and makes all of us tremendously more productive.

Strategy Manager, Large Healthcare Payer

Neebo is an easy-to-use Virtual Analytics Hub that provides a single source of access and truth for all your analytics assets regardless of type (data, documents, reports, dashboards, applications or models) or location (on-premises, cloud, SaaS or hybrid). Through Neebo analytic teams can find and use the right analytics assets to rapidly produce detailed same-day answers to complex questions.

Virtual Access to Any Analytics Asset

Organizations have an ever-growing amount of analytics assets, spread across numerous locations – on-premises, cloud, SaaS applications, or external services. Neebo connects to any asset virtually, regardless of where it resides, enabling analysts to find them quickly and start analyzing right away. Neebo leaves analytics assets in place and protected—eliminating security risks and resource-intensive information movement processes.

## Discover Analytics Assets in Any Form

Today's analytics assets come in many forms – data, reports, dashboards, SaaS application or external service reports, and more. Neebo provides a single place where analytics teams can quickly discover all these analytics assets and understand which best solve their problem. Analysts and data scientists can search, find and use more assets in their analysis to quickly produce the actionable results management desires.

Collaborate, Share and Reuse Analytics Assets

As organizations generate more analytics assets, many teams struggle to make sense of their landscape —what assets are out there that can I reuse, what they mean and how to best to use them. Neebo provides a collaborative environment where teams can share and reuse assets, collaborate to form new assets, and increase knowledge using familiar social media-like features and AI-augmented information about assets utilization.

Easy to Use SaaS Solution

Neebo is a fully managed SaaS solution containing patent-pending optimization and operational techniques, eliminating the need for IT and administration resources. Organizations can be up and running on Neebo in less than an hour, start discovering assets and creating new ones to bring very fast time to value.

Neebo Features

Connectors/Sources
